Using _____is a good way to ensure that a WordPress site is indexed by search engines.

A) a sitemap

B) robot.txt

C) a widget

D) a plugin

[ANSWER] Answer & Explanation:

robot.txt is used for indexing and usefull for SEO purpose.

Question 2:

What is theming?

[ANSWER] Answer & Explanation:

Theming is a collection of files that add the layout and style of the site. Theming also makes minor alterations to the usability / functionality of the site…it's not just CSS and markup. Theming uses variables, some lightweight PHP and templates. These concepts are new to those who make dreamweaver templates.

Question 3:

What are Regions and Blocks in Drupal theme?

> **[ANSWER] Answer & Explanation:**
>
> - Drupal uses 'regions' as 'areas in the layout'. By default there is a header, footer, content region, left and right sidebar.
> - You can add your own regions to a theme.- Drupal uses blocks as 'boxes' to put into regions of a site.- The area where designers generally put 'editable regions' for content is in the 'content region'.
